Energy Efficiency Science Initiative

Definition:

Seeks to identify and fund "bridging" research and development that falls between fundamental exploratory science and pre-commercial applied R&D by stimulating R&D that maximizes synergies among different research fields, technologies, investigator communities, and end-use applications. It also cuts across traditional energy end-use sectors by emphasizing distributed power generation applications for industrial and buildings systems, transportation and stationary power. This initiative expands on existing cooperative efforts between the Office of Fossil Energy and the Office of Energy Efficiency in areas such as natural gas-fueled turbine and fuel cell technologies, combined heat, power and cooling applications, hydrogen production, and carbon emission sequestration. This effort also involves extensive coordination with the Office of Science in pursuing follow-on research in areas critical to energy efficiency and clean energy development, such as basic biosciences, plant genetics, photo emission, heat transfer, new materials, catalysts and computational science.

Includes costs to provide the physical and operational infrastructure at the national laboratories, the Nevada Test Site, production sites, and other DP sites required to conduct the scientific, technical, and manufacturing activities of the Stockpile Stewardship program. The RTBF mission is to ensure that the sites comprising the weapons complex are implementing the technologies and methods necessary to make construction, operation, and maintenance of DP facilities safe, secure, reliable and cost effective and that the right facilities and infrastructure are in place to manufacture and certify the 21st century nuclear weapons stockpile.

Includes DP's share of the cost to operate and maintain DP-owned programmatic facilities in "warm standby" mode, a state of readiness at which each facility is prepared to execute programmatic tasks identified in the campaigns and DSW. This category includes DP's share of the cost of all structures, equipment, systems, materials, procedures and personnel necessary to provide program sponsors with a facility that is safe, secure, reliable, and "ready for operations."

Includes all costs of facility contractor employees (as defined in DOE N 350.5) who are temporarily assigned to the Washington, D.C. area and perform tasks for a Headquarters organization.

Definition: Includes costs to support a multi-year Facilities and Infrastructure Recapitalization (F&I) initiative to address issues that are outside of base maintenance and infrastructure efforts and to stem the downward trend in the condition of the complex and assure that DP continues to meet the major performance objective of ensuring the vitality and readiness of the national security enterprise.

DP.10.01.00.0 No Yes Recapitalization

Definition: Includes costs for the recapitalization activities which are prioritized and executed from a complex-wide list, which is updated at least semi-annually. All DP sites generate a prioritized listing of recapitalization projects as part of their Ten-Year Comprehensive Site Plans. DP validates the requests, and then evaluates descriptions of scope, justification, and estimated costs for proposed recapitalization projects, and integrates them into a single prioritized list that becomes the basis for program planning, budget requests, and program execution.

DP.10.02.00.0 No Yes Facility Disposition

Definition: Includes costs for the dismantlement and removal of deactivated facilities and infrastructure that are not radiologically contaminated and are excess to current and future DP mission requirements. These actions are taken at the end of the life of a facility to retire it from service, with adequate regard for the health and safety of workers and the public and the protection of the environment. These actions will improve our ability to manage the facilities portfolio and reduce long-term costs.

DP.10.03.00.0 No Yes Infrastructure Planning

Definition: Includes costs to prepare and develop necessary plans for the execution of out-year Facilities and Infrastructure Recapitalization (F&I) initiative projects. Within this effort is the development of analytical methods and tools for establishing credible restoration plans for each DP site using the newly-revised 10-Year Site Plans; infrastructure assessments to support F&I prioritization of maintenance and facility consolidation efforts; and planning and conceptual design activities for future priority landlord infrastructure line item construction projects. DP mission-specific construction projects will continue to be planned within appropriate programmatic accounts.
